Welcome!

This is a simple demo for automatic paper reviewing. The functionality is simple: you just upload a paper in pdf format, and it will automatically generate a review for you.

Now it's time to have fun ~

Usage Warning: This is a completely automated review system that takes in a paper and outputs a review automatically using machine learning. While it may be useful in some cases, such as generating a review of your own papers for reference purposes, or pointing out salient sentences of a paper that you are reviewing, it is not a replacement for a skilled human reviewer. The reviews it outputs are often wrong, unconstructive, and may be biased. If you are reviewing a paper, you should not feel that you can cut corners in your review by using the system in its current state. Please read [our paper](#) for a comprehensive explanation of the methodology and its limitations. **To respect your privacy, we won't keep your uploaded paper after reviewing it.**

Why can't my paper be processed? [See here](#)

How to write a good review by ourselves? [Check out useful resource](#)

Select File

Browse

☐ I understand that this system may generate incorrect, incomplete, or biased reviews, and the generated reviews are not to be used as a substitute for careful manual vetting of the paper's merits

«I Heller v. Uber var saksøker en tidligere sjåfør for samkjøringselskapet Uber som saksøkte på flere grunnlag, inkludert at han skal anses som ansatt i Uber. Høyesterett i Kanada avgjorde til fordel for saksøker og fant ut at han faktisk var ansatt i Uber. [...] I dette tilfellet ville jeg ha bestemt seg til fordel for Heller fordi jeg tror alle **fem faktorene** veier tungt for å finne at han er en ansatt i stedet for uavhengig kontraktør som gjør alle fem faktorene til sterke indikatorer etter mitt syn.»

Thick-billed parrot

From Wikipedia, the free encyclopedia

This page is about the species of parrot. For the genus, see [Thick-billed](#).

The **thick-billed parrot** (*Rhynchopsitta pachyrhyncha*) is a red parrot found in Mexico, that formerly ranged into the United States. Its position in parrot phylogeny is the subject of ongoing research. It is referred to as thick-billed macaw or thick-billed conure. It was formerly known as *guacamaya* ("macaw") or *cotorra serrana* ("mountain parrot"). As Endangered through IUCN,^[1] the thick-billed parrot's decline has been central to multiple controversies over wildlife management.

Senior Designer

Job post for a Design role in New York

Are you an innovator with imagination and ingenuity? A creative designer with strong marketing sensibilities, who likes creating something new that really makes a difference?

If you love the challenges and opportunities of a fast-paced team environment, combined with the benefits of working for an established and respected company, then we believe that Termfront is the place for you.

Requirements:

- You've earned a Bachelor's of Arts in Graphic Design, Art, or related field
- You have 1-3 years of experience in digital/interactive design
- clean design

Tab to Flow

Textio Score
Above Average

- Missing equal opportunity statement
- Needs more 'you' statements
- Job post is too short
- Not enough verbs
- Could use more engaging questions
- Sentences are too long

Slightly feminine tone

Textio is currently comparing your writing to 27,151 recent Design job posts in New York.

SOLUTION BRIEF Smart Tech Unlocks New Possibilities for N7 Customers

STRATEGIC ALLIANCE SOLUTION BRIEF

Smart Tech Unlocks New Possibilities for customers

Opt for solutions that expand your choices, not lock you in

Customer challenge

Your business is migrating to unified communications (UC). You are adding video collaboration to fully engage your customers, reduce travel and speed time-to-market. You've found that no single vendor has a solution for every unified communications need—Email, voice, video, IM chat, social software, web conferencing, content delivery, CRM, business process integration, cloud options, hosted services, or mobility, bring your own device. Your IT department can no longer afford the high cost of being locked into proprietary islands of communications so they turn to the best vendors with open, standards based solutions to meet the challenges of multi-vendor interoperability.

In your solution search you have many questions. How do we connect our existing N7 CTS room with Microsoft® Lync®? If we make a strategic UC architectural shift, do we still have investment protection with our NUCM and N7 video assets? Can we add conference rooms with automated two camera speaker location technology with Smart Tech SmartEye Director and equip more rooms serving more participants at a much lower cost? Can we reduce network bandwidth and get better resource utilization with the bridges we already own? Can we make our solution work on any network, without having to go down a proprietary, non-standard N7 Medianet upgrade path?

The Smart Tech solution

In today's world of mixed UC environments, the only practical way to truly align communications and keep your future options open is to orchestrate the broadest possible use of open standards and native interoperability — to enable all the disparate parts involved to work together seamlessly. The key to your interoperability is the Smart Tech® Real-life® Platform that acts as a central hub in your UC environment.

Taliban attacks German consulate in northern Afghan city of Mazar-i-Sharif with truck bomb

The death toll from a powerful Taliban truck bombing at the German consulate in Afghanistan's Mazar-i-Sharif city rose to at least six Friday, with more than 100 others wounded in a major militant assault.

The Taliban said the bombing late Thursday, which tore a massive crater in the road and overturned cars, was a "revenge attack" for US air strikes this month in the volatile province of Kunduz that left 32 civilians dead. [...]

Europe fit for the Digital Age

Unacceptable risk

High risk

Limited risk

Minimal risk

Required for high risk:

- *High quality of the datasets feeding the system to minimize risks and discriminatory outcomes;*
- *Logging of activity to ensure traceability of results;*
- *Detailed documentation providing all information necessary on the system and its purpose for authorities to access its compliance;*
- *Clear and adequate information to the user;*
- *Appropriate human oversight measures to minimize risk;*
- *High level of robustness, security, and accuracy*

Generasjon 17

Ingredienser

1 ts vaniljesukker

1 ts vaniljesukker

1 ts vaniljesukker

1 ts vaniljesukker

1 ts vaniljesukker

1 ts vaniljesukker

Generasjon 400

Ingredienser

100 g TINE Meierismør

750 g frukter

1 dl TINE Kremfølte

1 ts vaniljesukker

1 dl bakepulver

150 g sukker

1 stk egg

Slik gjør du det

Rør deigen av melet før du også legger mel og smeltes på kokebrettet.

Visp egg og sukker å deigen og legg blandingen på et stekebrett.

Trill sukker og blandet det i eggedosisen.

Stek kakene midt i ovnen i ca 10 minutter.

Rør resten med en slikkepinne sett det på stekebrett og

stek i ca. 1 time.

Avkjøl på pinner.

Generasjon 800

Ingredienser

1 stk eggeplomme

1 ss mørk sirup

120 g sukker

100 g TINE Meierismør

4 stk egg

2 dl hvetemel

1 ts bakepulver

1 ts hornsalt

1 ss malt kardemomme

2 dl rømme

2 dl Tinemelk Helmelk 3,5 %

2 dl melis

Slik gjør du det

Sett stekeovnen på 175 C i 10 min og finn fram stekeplate med bakepapir.

Sikt hvetemel og bakepulver.

Pisk egg og sukker luftig.

Smelt smøret i en kjele.

Sikt i hornsalt og brun de varme.

Rør i eggeblandingen

Avkjøl blandingen og rør inn i deigen sammen.

Bland sammen melis og eggehvite og **fordel glasuren over.**

Generasjon 900

1 ts malt kanel

1 ts malt pepper

1 ts malt ingefær

1 ts malt nellik

1 ts hornsalt

2 dl TINE kremost

150 g TINE Meierismør

3 stk egg

300 g mørk sjokolade, grovt hakket

2 ts pepper av den hvite

500 g sukker

Visp eggene og sukkeret.

Bland sammen det tørre og ha det i kjelen.

Avkjøl blandingen litt.

Elt sammen deigen.

Det er lettere å kjevle små deler av den store deigen.

Skjær kakene i litt et tynne skiver

Sett kakene blandet med sjokoladen på en stekeplate som du dekker med bakepapir.

Stek kakene i 9-10 minutter.

Avkjøl på rist og oppbevar i en tett boks.

Legg alt i stekepanne.

God morgen!

[L]
[SEP]

Raushet handler om at jeg har en tro, og tenne lys. Jeg har stillet i et hellig rom.

Mitt hjerte vanker i forventning. Og hjertet skal være glede.

Og Jesus, Jesus. Ved bordet sitter englene fra din tid og sier dette:

”Han fant de fattige og uvettige for å være nær.”

Gud ble tent av sin sorg og ventet.

Du er verd å elske.

EN L'AN 2000.
